

## Video Matrix – Application

### OVERVIEW

The Surveillus Video Matrix application delivers full system control for video switching, monitor wall controls, live view, playback and export controls via legacy CCTV keyboards. The application works in conjunction with HD Decoders and other system devices. Video Matrix™ offers full user control and security along with monitor and camera locking functionality. The application provides smart searching of video content based on camera number, camera name and events on standard monitors. This includes live or pre-recorded content.
